INDUSTRIAL MATHEMATICS

INDEX OF ARTICLES

VOLUMES I - XIV

1950 - ~~1964~~ 1966

INDUSTRIAL MATHEMATICS is published semi-annually by the Industrial Mathematics Society. The advance subscription price is $6.00 per annual volume of two issues. Back issues are also available at $6.00 per volume while in stock. Discounts prevail on quantity orders and sets. Purchase orders from individuals should be accompanied by check or money order.

INDUSTRIAL MATHEMATICS contains original articles dealing with the application of mathematics in industry. Persons having such manuscripts for publication should submit them in duplicate to the Editor, INDUSTRIAL MATHEMATICS for review. Questions on editorial matters should be similarly addressed. Authors' institutions or companies are asked to pay a charge of $7.50 per page for articles accepted for publication unless a sponsor is available.

Manuscripts should be typed double-spaced on one side of 8 1/2 by 11 inch unfolded paper in complete and finished form precisely as the article is to appear. Figures and Tables should be captioned and consecutively numbered with arabic numerals. Authors will receive galley proofs for correction purposes. One-hundred reprints without covers will be furnished to each author.

INDUSTRIAL MATHEMATICS SOCIETY
100 Farnsworth Avenue
Detroit, Michigan

VOLUME I 1950

Elementary Differential Equations of Fluid Mechanics, Dynamics and Strength of Materials . . . . . Dr. Paul F. Chenea

Applied Mathematics in the Electric Power Industry . . . . . J. E. Freer

Design and Construction of Digital Computing Machines . . . . . Carl C. Chambers

Analogies in Fluid Flow, Elasticity, and Soap Films . . . . . Dr. G.E. Hay

On the Importance of Anchorage in the Applications of Mathematics to Industry . . . . . Richard S. Burington

The Logic of Programming Electronic Digital Computers . . . . . A. W. Burke

Analogue Computation . . . . . Arvid W. Jacobson

Fluid Flow Mappers (Abstract). . . . . A. D. Moore

Location Estimators for Non-Gaussian Distribution . . . . . D. R. Elliot

The Differential Equations of Structures . . . . . Clayton J. Pajot

The Thermal Design of Evaporative Condensers (Abstract) . . . . . Hugh J. Scullen

VOLUME II 1951

The Median Ranks of Samples Values in Their Population with an Application to Certain Fatigue Studies . . . . . Leonard G. Johnson

Applications of Elementary Mathematics to Problems in Magnetism . . . . . Samuel R. Williams

High-Efficiency Cantilever Springs . . . . . Douglas G. Anderson

An Application of Liebman's Iteration Method to Viscous Flow . . . . . Leonard S. Lustick

Performance of Centrifugal Pumps from Affinity Laws at Non-Corresponding Operation Points . . . . . Arvid E. Roach and Howard H. Kehrl

Analytical Derivation of Gear Tooth "X" Factor . . . . . Douglas Hughson

Surface Stress and Strain of Spiral Involute Gears . . . . . Victor E. Francis

A General Steady-State Solution of the Two-Mass Torsion Problem . . . . . Earl F. Riopelle

Transient Motions in Linear Systems . . . . . J. Ormondroyd

Some Computing Problems in the Automotive Industry . . . . . Paul T. Nims

A Survey of Industrial Subsidy of the Study of Applied Mathematics . . . . Thomas H. Southard

A Thermal Design of Evaporative Condensers . . . . . Hugh J. Scullen

VOLUME III 1952

A Graphical Method of Solving Empirically Related Dimensionless Parameters, with and Application to Pipe-Line Flow . . . . . Arvid E. Roach

Operations Research . . . . . Arthur A. Brown

An Introduction to High-Speed Digital Computation . . . . . Walter F. Bauer

Energy Approach to Stress Problems . Clayton Pajot

The Effect of Slicing on Residual Stresses in Plates . . . . . Leonard G. Johnson

The IBM Card-Programmed Electronic Calculator . . . . . Justus Chancellor III

Application of the CPC to Automotive Engineering Problems . . . . . .Fred F. Timpner

Bending of a Circular Plate with Eccentric Hole . . . . . Samuel D. Conte

Construction and Use of Nomographic Charts . . . . . L. S. Johnston

Components of Digital Computers . . . . . E. Calvin Johnson

Matrix Iteration Method for Calculating Critical Frequencies of Vibratory System in Bending . . . . . George Sonnemann

Frequency Response Analysis of Feedback Control Systems . . . . . Charles A. Piper

Simplification of Contact Geometry for Spiral Gear Load Calculation . . . . . Werner F. Vogel and Dougals Hughson

VOLUME IV 1953

An Axiomatic Derivation of a General S-N Equation . . . . . Leonard G. Johnson

Expansions in Series of NON-Orthogenal Eigenfunctions . . . . . Robert Davies

On Some Non-Linear Partial Differential Equations . . . . . S. D. Conte

Elements of Atomic Energy: Analysis and Synthesis . . . . . Urner Liddel

The Influence of Automatic Computing Machines on Mathematical Research...H. D. Huskey

Linear Analysis of Feedback-Control Systems . . . . . E. Calvin Johnson

Directional Control of Automobiles . . . . . Robert Schilling

Bevel Gears - Their Generation, Kinematics, and Geometry . . . . . Allan H. Candee

VOLUME V 1954

Nuclear Energy in Industry . . . Henry J. Gomberg

Derivation of the Fundamental Equation of
Residual Stress Analysis by Dissection
. . . . . Leonard G. Johnson

Power for Guided Missiles and Space Ships
. . . . . Magnus von Braun

Kinematics of Steering an Automobile
. . . . . .S. R. Uniechowski

Problems in Shock and Vibration Control
. . . . . R. N. Janeway

Surface Curvature, a Tool for Engineers
. . . . . Ernest Widlhaber

Some Applications of Symbolic Logic
. . . . . James Hetrick

VOLUME VI 1955

The Matrix for an Industrial Game . . . R. Davies

The Effect of Bandpass Limitations on Analog Computer Solutions . . . . . J. Kaiser and E.J. McGlinn

A Procedure for Obtaining Numerical Solutions to Simultaneous, Non-Linear First Order Differential Equations . . . . . R. J. Sullivan

An Iterative Method for Finding the Quadratic Factors of a Fourth Degree Polymonial . . . . . F. Timpner

An Equiconvergence Theorem . . . . . S. D. Conte

The Mechanics of Hydraulic Brake Systems . . . . . W. A. VanWicklin

Election Forecasting on UDEC . . . . . S. Rosen

Approximate Stresses in Thick-Walled Cylinders by Continued Fractions . . . . . A. E. Roach

The Life History of an Equation . . . . . G. M. Rassweiler and G. E. Blell

The Effect of Surface Residual Stresses on Indentation Hardness L. G. Johnson

Approximating Functions for Digital Computers . . . . . L. R. Langdon

VOLUME VII 1956

The Engineering Applications of Statistics . . . . . David N. Collins

Determination of the Necessary Sample Size in Life Testing When the Length of Life is Exponentially Distributed . . . . . Calvin J. Kirchen

The Use of Computing Machines . . Claus B. Ludwig

Tire Vulcanization - An Application of Unsteady Heat Transfer . . . . . Samuel R. Schaffer

Some Non-Parametric Methods of Testing the Validity of Assuming that a Sample Comes from a Given Population . . . . Leonard G. Johnson

Analytical and Experimental Studies of Vehicle Dynamic Behavior . . . . . John A. Carlson

Improving the Validity of Transducer Measurements with Computing Circuits S. A. Lippman

Simplified Numerical Solution of a Catenary . . . . . Elihu Geer

The Mathematical Background of Spiroid Gears . . . . . Oliver Saari

Design of Orifices for Hydraulic Shock Absorbers . . . . . T. E. Lohr

VOLUME VIII 1957

Operations Research in Life Testing
. . . . . Leonard G. Johnson

Logical Programming and Algebraic Interpretation
. . . . . Harold W. Milnes

The Use of Signal-Flow Graphs in Kinetic Analysis of Nuclear Reactors . . . . . A. B. Van Rennes

Application of Root-Locus Analysis to Nuclear Reactor Systems . . . . . E. H. Lemon

Digital Simulation of Reactor Material Burnout . . . . Harold M. Morrison and John M. Bookston

A Digital Computer Solution of the Equations for Transient Heating of a Porous Solid, Including the Effects of Longitudianl Conduction
. . . . . F. A. Creswick

An Analog Solution of the Transient Temperature Distribution in an Infinitely Long Cylinder with Periodic Boundary Conditions
. . . . . Leonard S. Lustick

A Test of the Uniqueness of Solutions for Problems of Nonsteady Flow by the Method of Characteristics . . . . . J. Altenhoff

A Partitioning Technique for the Inversion of High Order Matrices . . . . . Joseph Perna

Undercutting Spur Gear Teeth . . . Calvin E. Hall

The Effect of Certain Nonlinearities in the Dynamic Performance of Valve Controlled Hydraulic Servonechanisms
. . . Michael B. Scherba and Anthony J. Gregory

VOLUME IX 1958

PART 1

Data Processing for Numerical Machining . . . . . E. C. Johnson

Cam Design on a Digital Computer... Walter Hoffman

What the Test Engineer Needs in the Way of Statistics. . . . . .Leonard G. Johnson

Error Correction in Solutions of Linear Systems . . . . . James S. Seward

The Automobile Engine as a Dynamic Vibration Absorber. . . . . John A. Carlson

Engineering Simplifications Versus Mathematical Rigor for a Problem in Conduction Heat Transfer...Thomas D. Shea,Jr.

Annuity Interest Rates . . . . . Wright Collier

The Problem of the Hampered Input . . . . . Fredirico Gabriel

PART 2

Tension-Torsion Interaction in Long Bars of Thin Symmetric Cross-Sections . . . . . Denos C. Gazis

A Modified Newton-Raphson Process for Approximation of Multiple Roots of Polynomials . . . . . Harold Willis Milnes

Optimum Allocation of Time and Equipment for Several Fatique Tests . . . . . Leonard G. Johnson

A Computer Program for Assessing the Reliability of an Assembly with Known Weibull Survivorship Functions . . . Leonard G. Johnson

Solution of the Orientation Problem by Digital Computer Techniques . . . . .Donald McAllister and Ferdinand Ohnsorg

A Method for Obtaining Generalized Transformation Operators on a Unique Integral Operator...David H. Woodward and Mark D. Epstein

Problems Associated with the Machine Translation of Russian into English . . . . Harry H. Josselson and Arvid W. Jacobson

VOLUME X

PART I 1959

Energy Losses of Small Rotors . . Donald J. Kenney

A "Chain Block" Experimental Design with an Application in Fuel Testing . . . Kan-chen Peng

A Measure of the Optical Quality of Proposed Automobile Windshield Designs. . John R. Gagnon

Fuel Injector Design Problem Donald F. Zawada

Analysis of Spring Installations for Low Frequency Suspension of Vehicles . . . Raymond R. McHenry

Design and Calculation of Progressive Compression Springs . . . . . Albert E. Roller

Experiences with Highly-Loaded Gearing . . . . . .Forest McFarland

PART II 1960

Algebraic Fractions Applied to Logarithmic Functions . . . . . Douglas G. Anderson

The Present Theory of Switching and Some of its Future Trends . . . . . A. A. Mullin

On Critical Shaft Speeds in Flexure of Spring Supported Automotive Drive Lines. . H. K. Sachs

Applying a Matrix Partitioning Technique to Solving Steady State Vibration Problems . . . . . James Duddles

A Two Stage Inventory Model Applicable to a Provisioning Problem . Frank B. Quackenboss and Allen V. Butterworth

VOLUME XI 1961

PART I

A Composite Infinite Slider Bearing . . . . . Donald F. Hays

A Two-Dimensional Theory of Stress Concentration Around Voids . . . . . Leonard G. Johnson

Stability Study of a Fluid Flow Problem With Flow Reversal . . . . . Richard L. Justice

Computers -- Large or Small? . . Robert K. Louden

Parameters Needed for Stress Calculations on Cams . . . . . Robert Davies

The Effect of Inclusions on the Fatigue Life of Steel . . . . . Leonard G. Johnson

PART II

The Nature of the Helical Gear Oblique Contact Line . . . . . E. J. Wellauer

Basic Geometry and Tooth Contact of Hypoid Gears . . . . . Meriwether L. Baxter, Jr.

Stress Concentration Caused by a Small Circular Hole in a Bent Plate . . . . . .Lajos Imre Nagy

A Graph for Determining CSP-5 Continous Sampling Plans . . . . . John S. White

Introduction to Nonlinear Tchebycheff Approximation . . . . . .John R. Rice

VOLUME XII 1962

PART I

Solution of the Deflection of Variable Thickness Plates by the Method of Equivalent Systems . . . . . Adam Kozma and Demeter G. Fertis

Equivalent Systems for Shear Deflections of Variable Thick Members . . . . . G. Fertis and H. Cunningham

Tables for Calculating the Compressive Surface Stresses and Reflections in the Contact of Two Solid Elastic Bodies Whose Principal Planes of Curvature Do Not Coincide . . . . . Adam Kozma and Harold Cunningham

Design Anal sis of the Automotive Leaf Spring . . . . . Dudley Fiscus

PART II

Mechanism Analysis by Vector Mathematics . . . . . Milton A. Chace

Particle Population Representation From Sieve Analysis . . . . R. C. Nicholas and Carl W. Hall

A Rheological Equation for Deformation -- Time Behavior of Some Biological Material . . . . . Nuri Mohsenin

VOLUME XIII 1963

PART I

Bessel Functions of Arbitrarily Large Order
. . . . . J. M. Patterson and W. M. Nunn, Jr.

Graphical Solution to Differential Equations That Have Separable Variables . .Harold C. Cunningham

Geometric Invariants of Discrete Dot Patterns
. . . . . Harold Willis Milnes

PART II

Theory of Successive Service Calls
. . . . . Dr. B. Grunebaum

The Dynamics of a Tape Whirling in a Narrow Annulus . . . . . W. E. Longlois

A Non-Parametric Estimation Technique
. . . . . George Gomolski

VOLUME XIV

PART I 1964

Application of Ultraspherical Polynomials to Asymmetric Non-Linear Oscillations
. . . . . H. H. Denman

A Graphical Procedure for Period Approximations in Symmetric Non-Linear Oscillations
. . . . . H. H. Denman and Wilfred J. Reilly

Least Squares Unbiased Censored Linear Estimation for the Log Weibull (Extreme Value) Distribution
. . . . . John S. White

Volume XIV Part 2 1964

A Program for Automating Circuit Layout.
----Thomas Aird & Harold Milnes

The Two-Arc System of Dimensioning The Gear Tooth Root Fillet, Arranged for Computer Programming. -----James H. Skelley

Vibration Isolation of a Quasi-Linear System.
-----Herbert K. Sachs

Volume XV Part 1 1965

The Science of Tolerancing. ---Robert G. Morris

Application of Ultra Spherical Polynomials to Non-Linear Systems with Step-Function Excitation.---Harry H. Denman & Y. King Liu

On the Solutions of Certain First Order Mixed Differential-Difference Equations.
----C. Y. Yeh and M. Kim

Volume XV Part 2 1965

Distributions Associated with the Quadrivate Normal.---K. S. Miller and Harold Sachrowitz

Estimation of Wall-Shear Stress for Pulsatile Flow in an Artery. -----Albert I. King

Some Multidimensional Distributions based on A Stationary Gaussian Markov Process (Discrete Parameter) ------Ti-Erh Lin

Volume XVI Part 1 1966

Characterization Theorems for Several Distributions and their Applications.--Satya D. Dubey

Evaluation of Error Measures, Condition Numbers and Error Bounds for Certain Matrices.
----Harry H. Denman and J. P. Porzak

A note on the Precise Computation of $\log_e N$.
----John S. White

Volume XVI Part 2 1966

A Variational Formulation for Hydrodynamic Lubrication.--Donald F. Hays & Harriet M. Curd

On the Multivariate Lognormal Distribution.
---R. M. Jones and K. S. Miller

A Variational Approach to Smoothing Unequally Spaced Data Subject to Random Errors.
-----Harold Willis Milnes
